PROFESSIONAL SUMMARY

DevOps & Cloud Engineer with hands-on experience in AWS infrastructure, CI/CD pipelines, and containerized deployments. Skilled in Terraform, Docker, Kubernetes, Jenkins, and CloudFormation for Infrastructure as Code. Experienced in designing scalable cloud architectures and automating deployments using DevOps practices. Delivered multi-tier architectures, improving deployment efficiency by 50% and reducing cloud costs by 20% through automation and optimized workflows.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, VPC, RDS, Lambda, CloudFront, IAM, EKS, ECS, CloudFormation, SQS)

DevOps & CI/CD Tools: Jenkins, Maven, Nexus, SonarQube, Ansible

Version Control: Git, GitHub

Containers & Orchestration: Docker, Kubernetes

Infrastructure as Code: Terraform, CloudFormation, Ansible

Monitoring & Logging: AWS CloudWatch, Grafana, Prometheus

Scripting & Programming: Python, Bash, Groovy

Operating Systems: Linux (Ubuntu), Windows

Databases: MySQL

Networking & Security: Subnetting, Routing, Security Groups, Load Balancers, IAM

Deployment Strategies: Blue-Green Deployment, Rolling Deployment, Auto Scaling

Methodology & Concepts: Agile (Scrum), CI/CD

Security & DevSecOps: SonarQube, OWASP, Trivy

PROJECTS

AWS Infrastructure Provisioning with Terraform

Technologies: Terraform, AWS (VPC, EC2, S3, IAM), Git

- Provisioned AWS compute, storage, and IAM resources using modular Terraform scripts for scalable and repeatable infrastructure.
- Managed three environments (dev, staging, prod) using version-controlled modules, ensuring consistency across deployments.
- Reduced manual setup time by 50% and strengthened security compliance via IAM policies.
- Improved infrastructure reliability and maintainability through reusable modules and automated configuration.

CI/CD Pipeline for Containerized Applications

Technologies: Jenkins, Git, Docker, Kubernetes, SonarQube

- Designed and applied end-to-end CI/CD workflows integrating Git repositories with Jenkins pipelines.
- Containerized applications using Docker and deployed them on Kubernetes clusters for scalable and consistent environments.

- Integrated systematized unit and integration tests, and SonarQube code quality checks to ensure secure and high-quality code.
- Configured mechanized rollback mechanisms to prevent downtime during failed deployments, increasing deployment reliability.
- Streamlined pipeline execution, reducing manual deployment effort by 60% and improving delivery speed.

Three-Tier Web Application Architecture on AWS

Technologies: AWS (VPC, EC2, RDS, ALB, Auto Scaling, IAM, S3)

- Developed three-tier architecture separating presentation, application, and database layers for optimal performance.
- Configured VPC, subnets, routing tables, and security groups to ensure secure and well-structured networking.
- Implemented ALB and Auto Scaling for efficient traffic management and high availability.
- Optimized database queries and caching, reducing AWS costs by 20% while improving application performance.

TRAINING

DevOps and AWS Trainee – Q-Spiders Bengaluru, Karnataka | Jun 2025 – Present

- Executed Jenkins pipelines integrated with Git, reducing manual deployment effort by 60%.
- Utilized AWS services including EC2, S3, VPC, IAM, Lambda, and CloudWatch.
- Deployed containerized workloads using Docker and Kubernetes.
- Assisted in troubleshooting production issues and streamlined CI/CD workflows.
- Collaborated with developers to implement infrastructure updates and monitoring dashboards.

EDUCATION

Master of Computer Applications (Cloud Computing)

SAGE University, Bhopal | CGPA: 9.04 | 2023 – 2025

CERTIFICATIONS

- AWS Cloud Practitioner Essentials [Certificate](#) | **Nov 2024**
- AWS Cloud Quest: Cloud Practitioner [Training Badge](#) | **Oct 2024**
- Fundamentals of Cloud Security [Certificate](#) | **Sep 2024**
- Oracle Certified Foundations Associate [Certificate](#) | **Sep 2024**

KEY ACHIEVEMENTS

- Achieved first position in MCA third semester (SGPA 9.65).
- Maintained 100% attendance during the MCA program.
- Built and deployed a production-ready three-tier architecture on AWS.
- Automated AWS infrastructure provisioning using Terraform, reducing setup time by 50%.
- Established CI/CD workflows with testing and rollback capability to improve deployment stability.
